Omnivis’04

Omnivis’04 is the fifth workshop on Omnidirectional Vision and neighbouring research areas. The aim of Omnivis’04 is to gather the Vision Community working or interested in networked, distributed, and omnidirectional Vision or Vision by non-traditional cameras in general. Contributions are sought on new and original research on any aspect of omnidirectional vision, including novel designs and algorithms for omnidirectional cameras and camera networks. All papers will be subject to a double-blind review process which will be carried out by a Program Committee of leading international researchers. The Omnivis’04 Workshop continues a series of workshops on Omnidirectional Vision, starting in 2000 in conjunction with CVPR, in 2001 with ICAR, in 2002 with ECCV, and in 2003 with CVPR.

Program Committee

Yiannis Aloimonos, University of Maryland, USA
Joao Barreto, University of Coimbra, Portugal
Ryd Benosman, Université Pierre et Marie Curie, Paris, France
Michael Bosse, MIT, USA
Kostas Daniilidis, University of Pennsylvania, USA
Christopher Geyer, University of California, Berkeley, USA
Andy Hicks, Drexel University, USA
Hiroshi Ishiguro, Osaka University, Japan
Reinhard Klette, The University of Auckland, New Zealand
John Leonard, MIT, USA
Emanuele Menegatti, University of Padova, Italy
Shree K. Nayar, Columbia University, USA
Tomaš Pajdla, Czech Technical University, Prague
Shmuel Peleg, The Hebrew University of Jerusalem, Israel
Robert Pless, Washington University in St. Louis, USA
José Santos-Victor, Instituto Superior Técnico, Lisbon, Portugal
Mandyam V. Srinivasan, The Australian National University, Canberra
Mohan Trivedi, University of California, San Diego, USA
Yasushi Yagi, Osaka University, Japan
